## VS001K | VS001K Medical Face Mask Typ I - Kids (Pack of 50)

100% Polypropylene  
approx. 145 x 95 mm

Virshields®

BLUE

Child's medical face mask 3-ply type I in blue | The Virshields Kids medical mask is a class I medical device and consists of three layers of non-woven fabric: one layer of spunbond, one layer of melt-blown fabric, another layer of spunbond | The inner layer is a non-woven fabric that absorbs moisture, including moisture produced by the user. The outer layer is hydrophobic to protect the user from splashes. The filter layer in the middle is the most important part of the medical face mask, as this layer provides a barrier against germs | In addition, the mask includes a full-plastic nose clip (90 mm) and ear loops (3.2 mm elastic) to adapt the mask to the face of the user | Due to the pleated design, the mask can be individually adapted to the wearer's face shape | The medical face mask is classified as type I according to EN 14683:2019+AC:2019 | The Virshields medical mask is a non-sterile medical product for single use only | This product is breathable, reduces the risk of spreading infections, especially in epidemic or pandemic situations, and has been tested with a bacterial filtration rate (BFE) of 95%. EN 14683:2019+AC:2019 TYPE I. | Pack of 50

## VS002 | VS002 Medical Face Mask Typ II (Pack of 50)

100% Polypropylene  
approx. 175 x 95 mm

Virshields®

BLACK

50 x medical face masks, 3-layer type II | The use of medical masks has always been one of the recommended protective measures in various environments, such as hospitals or clinics, as well as for industrial and other occupational purposes. Today, in view of the pandemic, face masks have become even more important. | These medical single-use masks are made of three protective layers of skin-friendly material and have flexible ear loops | The outer layer protects the user from germs, while the inner layer absorbs moisture, including moisture emitted by the wearer. The filter layer acts as a barrier against germs | Suitable for adults | Manufactured in Europe in accordance with DIN EN 14683:2019. This standard ensures that the production process and test methods are carried out such that these medical masks are able to protect against various disease-causing germs | These type II masks offer a filter performance of BFE ≥98% and their outer layer is hydrophobic, meaning it protects against potentially infectious fluids | The fabric used is tested as fire resistance class 1, which guarantees high fire resistance of the material for you as a customer | The manufacturer complies with quality management system ISO 13485 as well as cleanroom standard ISO-8, which are all relevant for the production of medical products. | CE conformity (93/42/EEC) | Not sterile

## VS004 | VS004 + VS017 Medical Face Mask Typ IIR (Pack of 50)

100% Polypropylene  
approx. 175 x 90 mm

Virshields®

BLUE

WHITE

Medical face mask type IIR according to class I | Three layers of nonwoven fabric, in the form of spunbond-meltblown-spunbond | BFE > 98% | The innermost layer is a nonwoven material that absorbs moisture produced by the wearer. | The outermost layer is water-repellent to protect the wearer from splashes | The filter layer in the middle is the most important component of the medical mask, as it is a barrier for germs | Plastic nose clip (90 mm) | Ear loops (3.5 mm-4 mm elastic) | Due to the pleated design, the mask can be flexibly adapted to the wearer's face shape | According to DIN EN 14683: 2019 + AC: Virshields mask achieved type IIR in 2019 | The Virshields face mask is a single use product | The product is breathable and the bacteria filter protects the wearer from dust, pollen and pathogens (e.g. droplet infections and respiratory diseases) | Pack of 50 | Made in Europe

## VS005 | VS005+VS040+VS102-VS105 Filtering Half Mask FFP2 NR (Pack of 10)

100% Polypropylene  
approx. 210 x 260 mm

Virshields®

BLACK

WHITE

BLUE

GREEN

RED

5 layers of nonwoven fabric (spunbond-meltblown-hot air cotton-meltblown-spunbond) | 3D-shaped | The inner layer is a hydrophilic spunbond nonwoven fabric that is used to absorb moisture, including moisture produced by the user. The outer layer is a hydrophobic spunbond to protect the user from splashes. The filter layers in the middle – meltblown, hot air and another layer of meltblown – form a barrier against germs | Double wire nosepiece | Flat, elastic ear loop | Disposable mask | The filter effect is ≥ 94% (BFE) | EN 149:2001+A1:2009 | The product is non-invasive, non-sterile and intended for short-term use | 10 units per pack, each mask is individually packaged | Made in Europe

High-quality standard safety vest with black seams in Korntex style | Certified according to EN ISO 20471:2013, EN 17353:2020 | Two transverse reflective strips | Size adjustable with two Hook and loop fasteners | The manufacturer guarantees the reflective properties in accordance with the EN standard for 25 washes at 40°C. | Instructions for use in the 24 official languages of the EU | Equipped with EAN barcode | Individually packed in a polyethylene bag | One safety vest generates around 30 kg of CO<sub>2</sub> in its lifecycle. It is not really possible to lower this figure. A native tree (beech) absorbs around 10 kg of CO<sub>2</sub> per year. Therefore, corresponding offsetting countermeasures are necessary. For each vest, a donation is made directly to a CO<sub>2</sub> binding project. Current project: Iplantatree.org in Germany. Transparency: All laboratory values, forecasts, calculations, investments in compensation projects and certifications are published. Break-even in just 7 years! For each box, 43 trees are planted in Germany.

# INDICATIONS

## A Word about Printing on Your Textiles

Please note, that in garments whose washing and care instructions indicate a higher laundry temperature than 40° C, this information is rendered invalid once the garment has been printed on. We generally advise you to wash your printed textiles at no temperature above 40° C so as not to affect the quality of the printing.

## Color Designations, Sizes and Laundry Properties

Color designations and sizes that appear in this catalog are not regulated by any industry standards. This can mean e.g. that a T-shirt in size XL made by manufacturer A can have quite different measurements than a T-shirt in size XL made by manufacturer B. Even within the same brand, different articles (e.g. polo shirts and T-shirts) can have different measurements although they are identified by the same size. Especially the so-called Slim-Fit/Body-Fit Shirts may diverge in size from the unisex articles of the same brand. Similar rules apply to shirts for women and men of the same manufacturer. It goes without saying that women's shirts are cut in a different style than the respective men's shirts although their size designations may be completely identical. Color designations are often not really informative. This already starts with the name itself. But even with color names about which most consumers have an image in their mind, there are often divergencies. Royal Blue or Apple Green are colors that conjure up different pictures in different people's minds. There simply is no binding industry standard for colors. So it may happen that the same color designation may look completely different from one product to the next between different brands or even between different articles of the same brand. Unfortunately, this issue cannot be solved by the color bars printed here in this catalog. Each printed color bar will appear differently depending on the ambient light source, and textile colors cannot be rendered 100% truly when printed on paper. So before you order a larger quantity of textiles and especially before you start printing or embroidering them, we encourage you to order a sample item. We cannot accept any complaints due to subjective expectations of sizes or colors. We'd like to draw your attention to one further important point that cannot be stressed enough: each textile article made from cotton or a cotton and polyester mix fabric needs to be laundered before it is put on and worn for the first time. Due to the chemical residues on textiles (although completely harmless and safe in themselves) it may otherwise happen that when the textiles are worn without having been laundered before, especially under the influence of ultraviolet rays, a chemical reaction between the residues and the body's perspiration takes place, affecting or even impairing the color of the garment. These color changes will persist and cannot be remedied by later laundering. Please note that claims or complaints in this matter cannot be accepted.

## Information about battery disposal

In connection with the sale of batteries or the delivery of equipment that contains batteries, we are obliged to draw your attention to the following. You are legally required as an end user to return used batteries. You can hand in old batteries, which we stock or have stocked as new batteries in our range, at our warehouse (address) or mail them back to us free of charge. Alternatively we suggest you use the public collection points that have been set up in your neighbourhood. The symbols shown on batteries have the following meanings. The crossed out rubbish bin symbol means you must not put the battery in household waste.

Pb = Battery contains more than 0.004 per cent lead

Cd = Battery contains more than 0.002 per cent cadmium

Hg = Battery contains more than 0.0005 per cent mercury.

Please observe the information provided above.

Underwear may never be returned or exchanged.

Unpacked shirts/blouses may not be exchanged or returned.

Shipping umbrellas from length 60 cm in separate boxes.

Masks and hygiene products may never be returned or exchanged
