Ensuring safety

Products dedicated for food contact must be evaluated seeing that chemicals can migrate from the materials into food. The materials must be manufactured in compliance with EU regulations, including proper manufacturing practices, so that any potential transfer to foods does not raise safety concerns, change the composition of the food in an unacceptable way or has any adverse effects on the taste and/or odor of foods.

REACH compliance

As a manufacturer selling our goods in the EU market, we must comply with REACH regulations, contributing to sustainable and environmentally friendly production practices. Colorissimo® aims at manufacturing the highest quality products while enhancing consumer safety, ensuring long-lasting gifts that will not impact the environment.

BPA-free collection

By choosing products made of safe materials, you care not only for the environment but also for your own health. BPA can cause a massive negative impact on our physical health, it is also difficult to recycle. We highly recommend the BPA-free drinking collection from Colorissimo® as it will help you improve your lifestyle.

YEARS
WARRANTY

Warranty

Colorissimo® drinking products are designed and manufactured to meet the highest standards of quality, all made in accordance with all the valued declarations and certificates to ensure safety. To provide you the best experience, our drinking collection is covered by a 2-year warranty.

Materials

Powder Coating

Unlike traditional liquid paint applications, our standing-out powder coating employs a dry powder, resulting in a robust finish reserved to the Nordic collection. This advanced technique ensures great resistance to chips, scratches, and wear, guaranteeing longevity and visual appeal. Moreover, our collection showcases a thoughtful design that seamlessly blends aesthetics with functionality. The distinctive pattern not only captures attention but also serves a practical purpose, enhancing the grip and preventing mugs from slipping out of your hand.

POSCO steel

Renowned for its unwavering commitment to international quality certifications and standards, Korean manufacturer POSCO ensures that our components meet the highest benchmarks of precision and durability. Selecting our products means more than just acquiring first-rate components – it signifies a choice for the highest quality and a commitment to sustainability. POSCO steel, with its exceptional properties, ensures optimal performance and longevity. Beyond that, you align yourself with a company deeply rooted in innovation.

Stainless Steel 18/8

This high-quality stainless steel offers excellent resistance to acids, carbonates, and corrosion, ensuring durability. Composed of 18% chromium for a protective oxide layer and 8% nickel for added strength, it also includes copper, enhancing its thermal insulation properties. Designed for demanding environments, it provides long-lasting performance.

Tritan

The material is known for its exceptional clarity, allowing it to resemble glass in appearance. Tritan is highly durable and resistant to shattering, making it a safer option, especially in comparison to glass. This characteristic makes it a popular choice for products intended for outdoor activities, such as water bottles. Additionally, Tritan resists absorbing stains and odors, providing a clean and hygienic option for beverage containers.

DRINKWARE

NEON WATER BOTTLE 550 ml. HTR01

Neon water bottle is a stylish and functional solution for those on the go. The bottle is made of durable Tritan material, resistant to damage, and the leakproof cap is constructed from a combination of plastic and ABS, ensuring longevity. The innovative design includes a convenient one-click opening mechanism for quick and easy access to your beverage. When not using the bottle, you can lock the cap to prevent the contents from spilling. The wide opening allows you to put ice cubes inside. The bottle is also equipped with a material handle for convenience. Covered by a 2-year warranty.

Materials: Tritan™, ABS, plastic, polyamide
Packing: factory packaging
Printing: pad printing
Certificates: Food Contact, BPA FREE, LFGB

NORDIC THERMAL MUG 650 ml. with 2 lids HBTN01

The Nordic steel vacuum water bottle is made of the highest quality 18/8 stainless steel, resistant to acids and carbonates. The solid finish prevents any mechanical damage. Double walls provide excellent insulating properties, maintaining cold temperature for up to 12 hours and hot temperature for up to 6 hours. The outer layer of the product is finished with powder coating which ensures a safe grip as well as great looks. With two replaceable lids, you can change the purpose of the bottle and use it either as a thermos or a sports bottle (a screw cap with a handle, made of BPA-free polypropylene, and a steel cap with a wide opening), making it a whole year product. Covered by a 2-year warranty.

Certificates and warranty

Essential safety

As a manufacturer, we declare that the product meets the key requirements of relevant European Union (EU) directives. Our products conform to essential safety and environmental standards, providing the best experience to our customers. We also provide clear and concise instructions for use, maintenance, and disposal of our products to help ensure their safe use.

RoHS directive compliance

We aim at reducing the environmental impact of our products by restricting the use of substances that pose risks to human health and the ecosystem. Providing safe and environmentally friendly components, we manufacture products that meet the highest standards of quality while maintaining customer's satisfaction.

Wireless technology

Providing convenience and flexibility, our electronics are designed with Bluetooth, so you don't have to worry about connecting electronics via cables to your devices. You can easily connect our products to your phone, tablet or a computer.

YEARS
WARRANTY

Warranty

Colorissimo* electronics are designed and manufactured to meet the pinnacle of quality benchmarks, made in accordance with all the valued declarations and certificates to ensure safety. To provide you the best experience, our electronic collection is covered by a 2-year warranty.

Materials

ABS

ABS is a type of thermoplastic polymer, widely used in various industries due to its versatile properties. It is known for its strength and durability. ABS can withstand physical impacts and stresses, making it suitable for applications that require robust materials. It has a smooth and glossy surface finish, which can be easily painted or coated, which makes it a perfect material for branding.

Silicone

Silicone is a flexible and durable polymer, widely valued for its heat resistance and versatility. It maintains its elasticity across a wide temperature range, making it ideal for applications that require resilience and longevity. Silicone is also water-resistant and non-toxic, making it suitable for medical, food-grade, and industrial uses. Its smooth, non-stick surface ensures easy cleaning and maintenance, enhancing its practicality in various environments.

AUDIO EQUIPMENT

COLORISSIMO® WIRELESS SPEAKER PS50

The compact wireless speaker is a versatile gift idea that will satisfy everyone. The speaker connects via Bluetooth and operates for up to 8 hours on a single charge. It is covered in high-quality silicone and ABS, making it resistant to damage. The speaker is portable and equipped with a fabric loop to which you can attach keys or a keychain. Covered by a 2-year warranty.

Essential safety

As a manufacturer, we declare that the product meets the key requirements of relevant European Union (EU) directives. Our products conform to essential safety and environmental standards, providing the best experience to our customers. We also provide clear and concise instructions for use, maintenance, and disposal of our products to help ensure their safe use.

YEARS
WARRANTY

Warranty

Colorissimo® products are designed and manufactured to meet the highest standards of quality, all made in accordance with all the valued declarations and certificates to ensure safety. To provide you the best experience, our tool collection is covered by a 2-year warranty.

Materials

ANODIZED ALUMINIUM

Aluminum

One of the primary advantages of aluminum is its low density, making it significantly lighter than many other metals. This property is particularly beneficial for tools that need to be portable and easy to handle. Despite its lightweight nature, aluminum boasts a high strength-to-weight ratio, contributing to their overall efficiency and usability. Moreover, aluminum has natural corrosion resistance, making the tools suitable for use in different environments, including outdoor settings.

Tungsten
Carbide

Tungsten carbide

Tungsten carbide is a composite material made up of tungsten, a heavy and dense metal, combined with carbon. This compound results in an extremely hard and durable material that is widely used in the production of tools and other industrial applications. Tungsten carbide is chemically inert and resistant to corrosion, making it suitable for use in challenging environments where exposure to harsh chemicals or corrosive substances is a concern.

2Cr13 and 3Cr13 stainless steel

These specific grades of stainless steel offer exceptional resistance to acids and carbonates, ensuring longevity and reliability in diverse applications. Our stainless steel is a composition of 2% and 3% of carbon with about 13% chromium content, which enhances their corrosion resistance. The martensitic structure of these steels provides them with a level of hardness suitable for various tools.

Titanium

Titanium is a durable, corrosion-resistant metal known for its high strength-to-weight ratio and excellent durability. One of the primary advantages of titanium tools is their lightweight nature. Titanium has a low density, making tools made from it easy to handle and carry, yet despite its low weight, titanium is known for its impressive strength. Additionally, titanium has great ability to withstand elevated temperatures, which can be advantageous in certain situations.

Liner lock

Providing the tool lock design, our tools collection has built-in safety device that prevents the blades from closing during use. It effectively eliminates the risk of any harm and doesn't affect the work of your tool.

ANODIZED
ALUMINIUM

Anodization

Color anodization on metal is a process that involves applying a decorative and protective oxide layer to the surface of a metal through anodization. Color anodization not only adds aesthetic appeal but also enhances the metal's resistance to corrosion and wear. It provides a durable and decorative surface finish that is widely appreciated in various industries.

TITANIUM-COATED TOOLS

OPTIMA EMERGENCY TOOL MK03T

A massive and durable Optima emergency knife in new guise, made of high-quality stainless steel with titanium coating for improved hardness and extra corrosion resistance. The profiled handle ends in a robust window breaker and a car belt cutter. Opens with a double-sided pin, ideal for both right and left-handed users. Features a liner lock safety device to prevent accidental closing during use. A metal clip allows the knife to be clipped to a belt or in a trouser pocket. This knife will find use as an everyday knife as well as an emergency knife. Ideal for paramedics, drivers, extreme sports practitioners. Covered by a 2-year warranty.

OEKO-TEX®

The OEKO-TEX® Standard 100 is a globally recognized certification system, mainly for textiles. The certification covers a wide range of potentially harmful substances, including but not limited to formaldehyde, heavy metals, pesticides, and various chemicals known to be dangerous. We make sure that our products are tested for harmful substances and meet rigorous safety standards.

Warranty

Colorissimo® products are designed and manufactured to meet the highest standards of quality, made in accordance with all the valued declarations and certificates to ensure safety. To provide you the best experience, our softshell jackets and sport luggage collection is covered by a 3-year warranty.

REACH compliance

As a manufacturer selling our goods in the EU market, we must comply with REACH regulations, contributing to sustainable and environmentally friendly production practices. Colorissimo® aims at manufacturing the highest quality products while enhancing consumer safety, ensuring long-lasting gifts that will not impact the environment.

Materials

Breathable material

The jacket is made of breathable fabric to allow moisture vapor to be transmitted through the material (breathability at 10,000 g/m²). This innovative design ensures that you stay dry and comfortable, even during the most active pursuits. The fabric's advanced technology creates a microclimate within the jacket, allowing excess heat and moisture to escape while preventing outside elements from penetrating.

Keep warm

Softshell jackets excel at keeping you warm and dry, no matter of windy or damp conditions. The capacity to preserve warmth is paramount, given that chilly temperatures not only induce discomfort but also impede your body's efficacy and performance. Let your jacket transcend mere accessory status—it serves as your steadfast shield against the elements.

Windproof design

Our softshell jackets are made of windproof fabric and designed for demanding use. The highest parameter of windproof 10 000 provides excellent wind protection, shielding against chilly breezes. This level of wind protection not only safeguards you from the biting cold but also enhances your overall comfort during use.

Light & durable

Despite using the most effective and high-quality materials, we understand how important it is to keep your clothing light and pleasant to wear. Our softshell jackets are designed to be not only durable in extreme conditions, but also to ensure your comfort.

Exceptional quality

Ensuring the highest standards of quality, our products are designed and manufactured with utmost care. The softshell jackets are meticulously produced in a factory collaborating with **Hi-Tec** and **Jack Wolfskin**, providing the highest-grade product and great finishing.

YKK zippers

In order to provide you the comfort of non-jamming and reliable zippers, we use the fasteners from a Japanese company - YKK - a global leader in the fastening industry. YKK is most famous for its production of zippers. The company manufactures a significant portion of the world's zippers, and its products are widely used in various industries, including apparel, automotive, and luggage.

REACH compliance

As a manufacturer selling our goods in the EU market, we must comply with REACH regulations, contributing to sustainable and environmentally friendly production practices. Colorissimo® aims at manufacturing the highest quality products while enhancing consumer safety, ensuring long-lasting gifts that will not impact the environment.

Warranty

Colorissimo® products are designed and manufactured to meet the highest standards of quality, all made in accordance with all the valued declarations and certificates to ensure safety and customer's satisfaction. To provide you the best experience, our business collection is covered by a 3-year warranty.

Materials

Exceptional quality

Our commitment to the highest quality is evident in the meticulous design and manufacturing of our products. The business backpacks are crafted with utmost care in a factory collaborating with Wenger, ensuring the highest standards and delivering a product of superior quality with excellent finishing.

AirChannel system

In order to provide the comfort of use, our backpacks are designed with a breathable back system. That allows air to circulate between the backpack and the user's back, helping to reduce heat and moisture buildup. This solution ensures a cool and dry environment even during extended periods of wear.

RELIABLE MATERIALS

Reliable materials

Within our business collection, we take pride in creating products of the highest quality, manufactured with a keen focus on durability and reliability. The use of Polyester 1680D sets our collection apart, ensuring longevity that surpasses industry standards. This particular type of polyester is distinguished by its dense structure, enhancing the overall robustness of our products. Our commitment to durability extends to the thoughtful design - a reinforced back adds an extra layer of strength, and sturdy straps contribute to the overall structural integrity.

MISTRAL BAG

Certificates and warranty

REACH compliance

As a manufacturer selling our goods in the EU market, we must comply with REACH regulations, contributing to sustainable and environmentally friendly production practices. Colorissimo® aims at manufacturing the highest quality products while enhancing consumer safety, ensuring long-lasting gifts that will not impact the environment.

YEARS
WARRANTY

Warranty

Colorissimo® products are designed and manufactured to meet the highest standards of quality, all made in accordance with all the valued declarations and certificates to ensure safety and customer's satisfaction. To provide you the best experience, our umbrellas are covered by a 2-year warranty.

Materials

DAS system

To provide the highest comfort of use, our umbrellas are designed with built-in DAS (Double Automatic System). The mechanism allows you to automatically open and close the umbrella with a single click of a button. Experience the convenience.

Antiwind system

Enhancing the umbrella's resistance to strong winds, we design them with an addition of an antiwind system. This feature is highly valuable in adverse weather conditions as it prevents the umbrellas from flipping inside out.

Reliable materials

Within our business collection, we take pride in creating products of the highest quality, manufactured with a keen focus on durability and reliability. One of the notable properties of polyester pongee is its water-resistant nature. The fabric has a tight weave that helps repel water, making it a great choice for umbrellas. It is also known for its durability as it can withstand regular wear and tear, making it a practical choice for items that require strength and longevity.

Essential safety

As a manufacturer, we declare that the product meets the key requirements of relevant European Union (EU) directives. Our products conform to essential safety and environmental standards, providing the best experience to our customers. We also provide clear and concise instructions for use, maintenance, and disposal of our products to help ensure their safe use.

Polyester Pongee

Polyester pongee is a high-quality fabric widely used in umbrella canopies due to its durability and water-resistant properties. It provides excellent protection against rain while remaining lightweight and quick-drying. Its smooth texture and resistance to wrinkles ensure a sleek appearance, making it a reliable and stylish choice for umbrellas.
